SUHA NASREEN M

DevOps & Cloud Engineer | Infrastructure Automation & CI/CD
+91 8075782998 | suhanasreen@gmail.com | linkedin.com/in/suha-nazreen-3a7a47205

PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with 3+ years at Accenture, promoted to Analyst for consistently improving infrastructure reliability and CI/CD automation. Experienced across the full DevOps lifecycle, including provisioning and managing cloud infrastructure with Terraform, automating configuration with Ansible, and running containerized deployments with Docker and Kubernetes, across VMware infrastructure and Azure cloud. Comfortable owning problems end-to-end, from diagnosing root causes to building automation that removes recurring manual work.

RELEVANT EXPERIENCE

DevOps Analyst Accenture

August 2025 Present | Promoted to Analyst | Project: ROCHE Diagnostics Global Pharmaceutical Client

- Automated pharmaceutical data deployment workflows by building and maintaining **GitLab CI/CD** pipelines, enabling consistent and controlled onboarding of 30+ datasets per month.
- Created datasets in **VS Code** and version-controlled them through **Git**, maintaining and editing production data in **Snowflake** using **SQL**.
- Supported **ETL** processes and data product management, ensuring data quality and consistency across pharmaceutical data products.
- Designed scheduled **CI/CD** pipelines running daily across 5 business domains, reducing manual deployment effort.
- Managed **GitLab** repositories, branching workflows, **YAML** pipelines, and **.htaccess** configurations, enabling consistent, version-controlled changes across environments.
- Managed and approved 25+ merge requests per month, enforcing release governance and controlled promotion of changes across environments.
- Built a platform analytic dashboard that cut the manual issue tracking effort by 90% and sped up issue identification.

DevOps Engineer & Cloud Administrator Accenture

June 2023 July 2025 | Project: GAPTECH US-based Retail Client

- Managed **Azure** and **VMware** infrastructure across 100+ **Windows** and **Linux** servers/VMs, including provisioning, configuration, resizing and troubleshooting.
- Provisioned **Azure** Infrastructure using **Terraform IaC** across production and non-production environments.
- Supported identity and access management across **Azure** and **Windows Active Directory**, managing user accounts, permissions, and resource access.
- Deployed **Docker** containerized applications on **Azure Kubernetes Service (AKS)**, managing deployments, services, logs, and troubleshooting.
- Managed 80+ **CI/CD** workflows monthly in **GitLab**; resolving build and deployment failures.
- Automated server patching and maintenance using **Jenkins** and **Azure Automation**, with scripts version-controlled in **GitHub**.
- Led 24-hour production monitoring during Black Friday using **Prometheus** and **Grafana** enabling proactive incident detection at peak traffic.
- Developed **Python** scripts to automate server administration and health checks, reducing manual effort by 80%.
- Resolved 50+ infrastructure incidents and change requests monthly through **ServiceNow** and Authored 10+ technical **SOPs** to standardize support practices.

SIRI Enterprises (Internship)

April 2021 January 2022

- Revamped a business page on Instagram that led to a 40% increase in followers and a 4% increase in revenue.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure, Amazon Web Services (AWS)

Infrastructure as Code & Configuration Management: Terraform, Ansible, IaC Principles

Containers & Orchestration: Docker, Kubernetes

CI/CD & Version Control: Jenkins, Azure DevOps Pipelines, GitLab CI/CD, Git

Monitoring & Observability: Grafana, Prometheus, Azure Monitor, Log Analytics

OS & Virtualization: Linux & Windows Server Administration, VMware vSphere

Scripting & Automation: Python, Bash, JSON

Data & Databases: Snowflake, SQL, dbt

ITSM & Collaboration: ServiceNow, Jira, Postman

PROJECTS

ServicePulse Docker & Kubernetes Operations Dashboard

Docker | Kubernetes | nginx | YAML | GitHub Repository

- Packaged a static operations dashboard as a versioned **Docker** image (nginx) and deployed it on a local **Kubernetes** cluster using Deployment and Service manifests in YAML.
- Exposed the ClusterIP Service via port-forwarding, and demonstrated scaling, self-healing after Pod deletion, and a zero-downtime rolling update from v1 to v2.
- Documented failures with root causes and fixes.

Dockerize a Service Status API

Python | Docker | GitHub Actions | GitHub Container Registry | GitHub Repository

- Built a containerized Python status API using **Docker**, with configurable staging and production environments and container health checks.
- Implemented **GitHub Actions CI/CD** to automatically build and publish Docker images to GitHub Container Registry.

CERTIFICATIONS & TRAININGS

HashiCorp Terraform Practical Labs
Completed hands-on labs on Infrastructure as Code (IaC) using HashiCorp Terraform.

Google Cybersecurity Professional Certificate
Penetration testing + Vulnerability assessment

Scientific Computing with Python - freeCodeCamp
Completed practical training and coursework covering core Python programming, algorithms, data structures, and automation principles.

EDUCATION

Bachelor of Commerce with Computer Applications - Bharathiar University, Nehru College of Arts and Science
Commerce with Computer Applications - Bharathamatha Higher Secondary School
